FUEL FILTER ASSEMBLY

1 YEAR WARRANTY

S-FFA

The STM® S-FFA is a 1" diesel fuel filter assembly, designed to remove particulate contamination before fuel reaches your dispensing equipment or machinery. The clear polycarbonate bowl makes filter condition easy to check, and the interchangeable elements let you choose a disposable 30-micron paper element or a reusable steel element. With flow rates up to 60 LPM at pressures up to 3.5 bar, it is ideal for bulk tanks, service trucks and utility vehicles, as well as workshop, fleet, agricultural and field service use.

Handles Flows Upto 60 LPM

1" BSPP (F) Inlet/Outlet

Easy Service Design

Clear Polycarbonated Bowl

Water Drain Valve

Dual Filteration Options (Paper & Steel Elements)

FEATURES AND BENEFITS

- Clear polycarbonate bowl for visual inspection of filter condition & contaminants.
- 30-micron disposable paper element for routine diesel filtration.
- Reusable steel element (55 mesh) where periodic cleaning is preferred.
- Interchangeable elements, so one assembly suits both.
- Water drain valve for draining water from the bowl.
- Flow rates up to 60 LPM at pressures up to 3.5 bar (50 PSI).
- 1" BSPP (F) inlet and outlet for easy in-line installation.
- Thread seal tape supplied for quick installation.

TECHNICAL SPECIFICATIONS

Model	S-FFA
Flow Rate	60 LPM
Maximum Pressure	50 PSI
Compatible Fluid	Diesel
Filtration Rating (Paper Element)	30 Micron
Filtration Rating (Steel Element)	55 Mesh (Steel Element)
Alcohol Content (Maximum)	10%
Net Weight	0.65 kg

Available Replacement Filter Options :

- PN : S-FFREP - Paper Element
- PN : S-FFRES - Steel Element
